e2e Projects

by e2e Software

e2e Projects

e2e Software has more than a decade of experience developing robust scalable software solutions for Global Enterprises

We have experience of delivering successful projects in different geographical locations and times zones

With our office in The Netherlands we offer local contracts while giving our customers the full access to International Talent and cost effective pricing

e2e has a proven track record of being a dependable partner for all segments, from Startups all the way to Large Enterprises
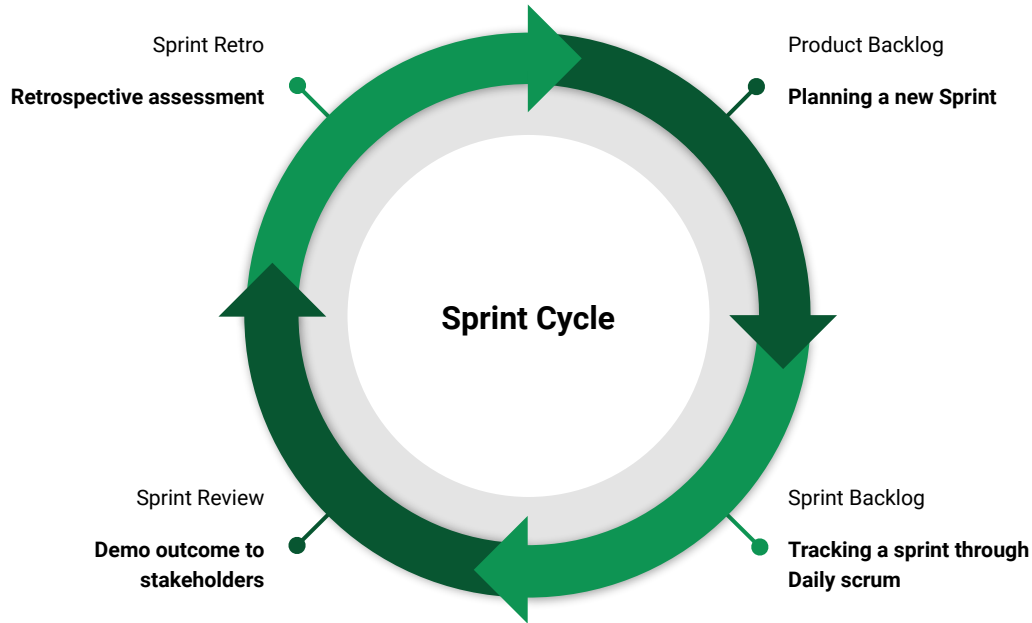

Our 5 Key Design Principles

01	**Strong Data Engineering**	Consolidate diverse data sources into a single harmonized warehouse for a solid foundation
02	**Design for Scalability**	Allow introducing new data sources to the solution in the future
03	**Security and Compliance**	Respect the security and compliance constraints of the customer at all development stages
04	**Hybrid Architecture**	Take advantage of both open source and commercial tools
05	**Maintain Balance**	Use a practical approach to avoid over and under engineering

Analytics video 4 mins by our CTO

our Approach - Scrum, with a lot of experience

Sprint Retro
Retrospective assessment

Product Backlog
Planning a new Sprint

Sprint Cycle

Sprint Review
Demo outcome to stakeholders

Sprint Backlog
Tracking a sprint through Daily scrum

Quick Results
Don't have to wait for the entire development to finish

Adaptable
Change course mid-development as many times as you like
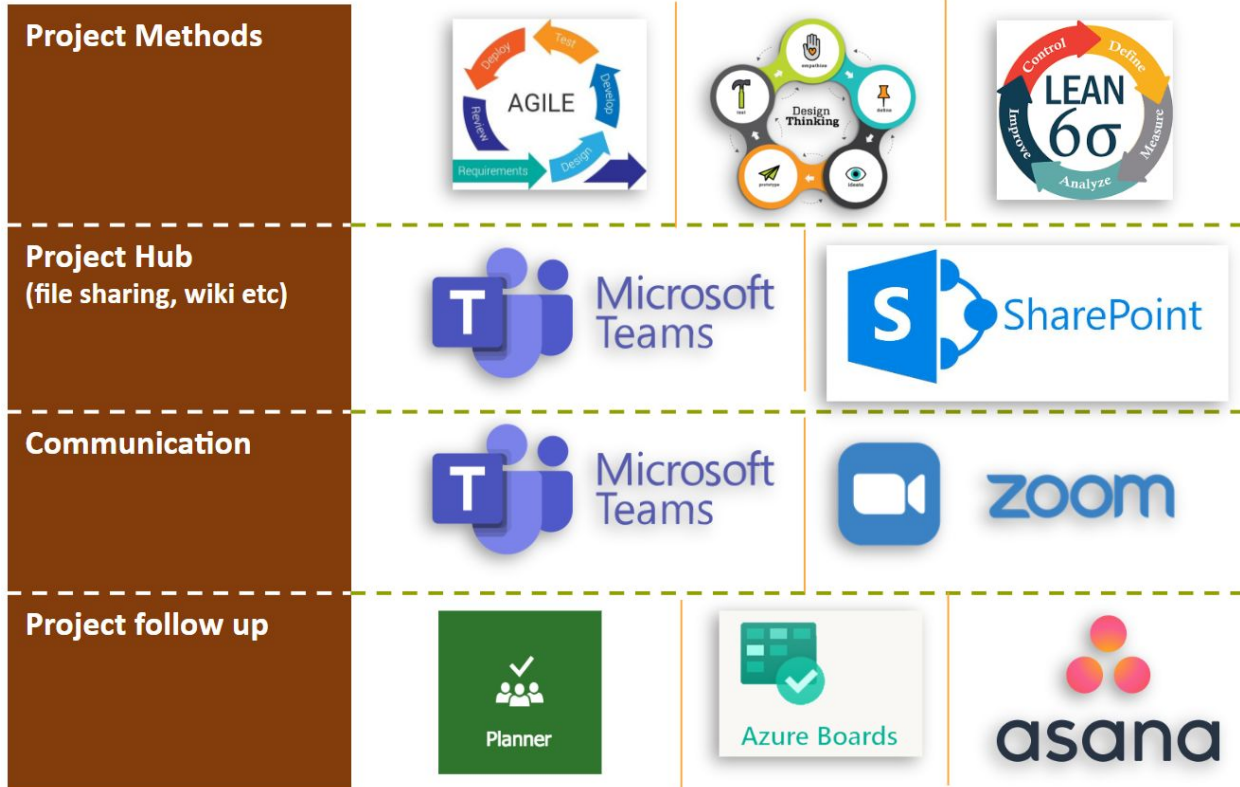

Risk Reduction
No surprises at the end

Methods & Tooling

- We have large experience in remote implementations

- These are just a few examples of the tools we are successfully using

- During the exploration phase we will decide which tools to use

- Hosting of the tools can be done within the customer environment or remote on our infrastructure

Project Methods	AGILE	Design Thinking	LEAN 6σ
Project Hub (file sharing, wiki etc)	Microsoft Teams	SharePoint	
Communication	Microsoft Teams	zoom	
Project follow up	Planner	Azure Boards	asana

Expertise - Custom Build Software

BIG DATA SYSTEMS	**SURVEY AND ANALYTICS**
NON-INTRUSIVE BI SOLUTIONS	**LIGHTWEIGHT WORKFLOW APPLICATIONS**
DATA INTEGRATION SYSTEMS	**DATA MONETIZATION APIS**
CLOUD DEPLOYMENT & MIGRATION	**MOBILE APPLICATION DEVELOPMENT**

10+ Years Projects Experience

e2e started in 2010 as a pure offshore software company designing and developing bespoke software. A lot has happened since then. With our offices in Lahore, San Francisco and Rotterdam we have the capability and reach to service customers in almost all parts of the world with our experienced team of 50+ software engineers. We have 3 business lines:
* Software projects
* Software Product Development and
* Remote interim.
e2e is a socially conscious and an equal opportunity employer.

Highlights

- Since 2010
- Software Projects
- Remote Interim
- Software Products

- Experienced Management Team
- Lahore, San Francisco, Rotterdam
- 50 Experienced Software Engineers
- FMCG, Healthcare, Logistics, HR, Finance
